Summary

React Native Developer | Crafting Scalable, User-Centric Mobile Products

I'm a React Native developer with 2 years of experience building mobile apps that are not just functional—but truly product-driven. I've worked across domains like social media, e-commerce, and transportation, always with a focus on delivering features that users love and products that scale.

I bring a full-stack mindset to mobile development, blending front-end finesse with solid backend logic using technologies like TypeScript, Node.js, MongoDB, and MySQL. I enjoy diving deep into complex UI/UX challenges, optimizing performance, and even resolving tricky package/versioning issues that can slow teams down.

What sets me apart?

I care deeply about the product, not just the code. I think about the “why” behind every feature, collaborate closely with cross-functional teams, and aim to build experiences—not just interfaces.

Core Skills:

React Native • React • TypeScript • Node.js • MongoDB • MySQL

Product Experience:

Social Media App – Interactive video content, engagement tools, and real-time updates.

E-commerce App – Seamless navigation, smart product displays, and secure payments.

Transportation App – Real-time tracking, route planning, and booking flows.

My Goal: To grow into a standout product engineer—creative, dependable, and driven to build tech that genuinely improves user experience. I'm always seeking challenges where I can make meaningful impact in product teams.

Experience

DigiMonk Technologies (CMMI Level 4 Company)

React Native Developer

April 2025 - Present (8 months)

Gwalior, Madhya Pradesh, India

Softech planet technology

React Native Developer

December 2024 - April 2025 (5 months)
